

Curved Washer

We are engaged in offering curved washers like cylindrical curved washers, etc. IIS curved spring washers are made of tempered steel and stainless in some sizes. All the washers are deburred using our proprietary process to achieve the best round edges for longer life. Curved Washers have distinct advantages over conventional wire springs where weight and space is concerned.

Special Features of Curved Washer

- Two point contact with high expansion under load
- Higher deflection compared to other washers
- Near to linear spring constant
- Lighter loads characteristics
